# Skilly

The ultimate interactive learning platform to support and develop essential wellbeing and career skills in schools

Skilly is our unique cloud software solution enabling your school to deliver digital career and wellbeing programmes, engaging students to learn and practice key life skills to improve their performance.

Skilly reduces teacher workload, as all of the skill content is included, ready to deliver, freeing up valuable time.

Simple to set up with a highly engaging user interface that can be customised for your school, Skilly gives you live metrics to simplify your reporting process on engagement and delivery.

Over 180 skills for your students to learn, practice and embed including:

resilience	forming habits	positivity
leadership	ambition	wellness
active listening	gratitude	work ethic
growth mindset	personal brand	mentoring
dreaming big	curiosity	
critical thinking		

Deliver and track essential skills for students with the ultimate interactive learning platform

For students to succeed and prosper beyond school, they require a high competency in key life-skills to manage their wellbeing and take advantage of future career opportunities. Like any skill, higher levels of proficiency comes with the practising of those skills.

Furthermore, it's now essential for teachers to track and report upon the engagement delivery of these programmes, which can be an administration-heavy and time-consuming process.

This is where Skilly **comes in...**

simple effective affordable

How it works

Skilly is all online, customised for your school. It begins with assessments, to establish baseline competency so you can assign targeted practices to build the students' knowledge. Assessments can be repeated so you can monitor overall performance and progression. Learning can take place independantly or in class.

Skilly does all the heavy lifting, enabling you to provide students with a customised programme, combining micro-learning with activities to assist in embedding a wide range of key skills.

In real-time, tutors observe engagement levels by viewing student inputs on their practice activities posted in Skilly. The student history, skill content and lesson plans are all in one place. A simple dashboard allows you to track progress for the student, class and entire year.

Students are motivated to pro-actively complete their programme and can be awarded digital merits of accomplishment.

Wellbeing

Skilly is leading the way with a broad range of assessments and practices, delivered in manageable stages to fully support the schools curriculum including the ATL framework.

We have developed sequential modules, designed specifically to support teachers and students. You get the added value of knowing all engagements are recorded and tracked for all students in the school, helping to meet reporting requirements for the Boards of Management, education and governing bodies.
150+ skills covered including:

- Creativity
- Staying well
- Working well with others
- Minding myself

Career development

Skilly teaches students all the 'How to...' essential practical career skills within the Career Development programme. This has been built with 30 career skills to practice as the student progresses in 3 stages - Career Basic, Career Building and Business Etiquette.

We've designed this programme specifically for senior school students and this is the perfect time to start thinking about what students need to support their career ambitions.
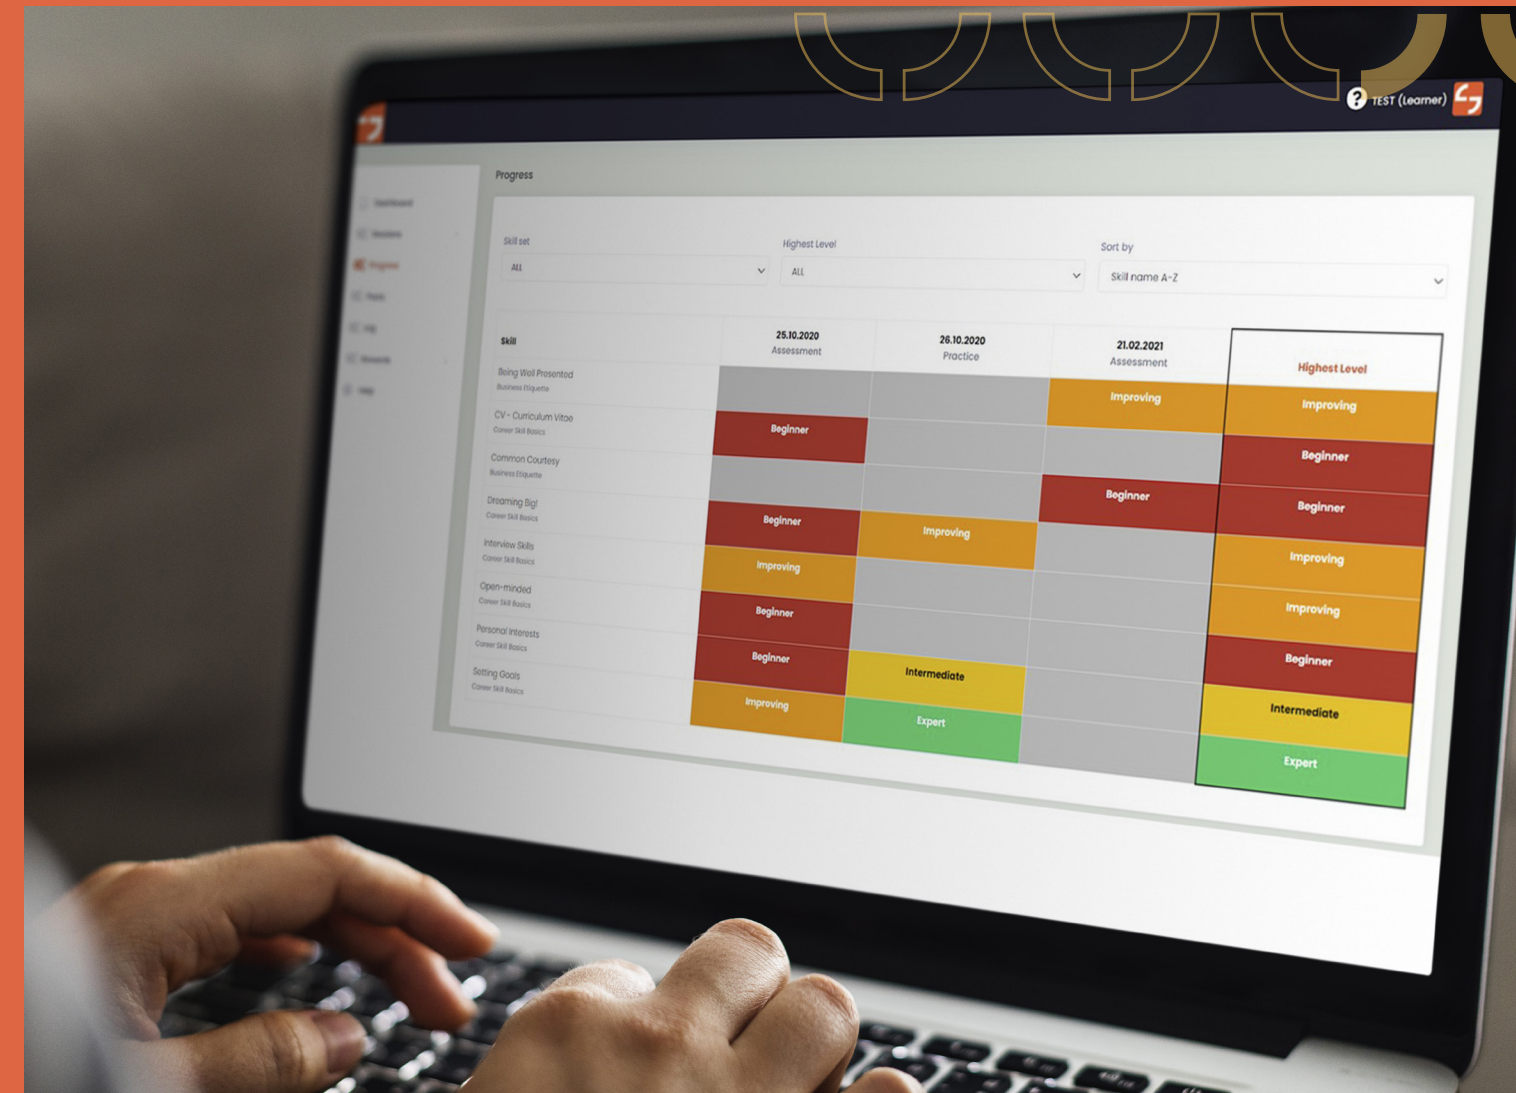

30+ skills covered include:

- CV development
- Interview skills
- Setting goals
- Growth mindset

What Skilly will do for you

- Flexibility - Fully customisable lessons, allowing you to deliver the teaching programme tailored uniquely to your students' needs.

- Easier reporting - Live data available to monitor and track each student's development and monitor wellbeing activity in the school, making reporting more efficient.

- Unlimited content - Use Skilly's content, (including videos, articles, practices etc.) to deliver digital lessons or use publishing tools to add your own content.

- Planning - Adjustable timing to schedule completion in a way that works for you and your students, not fixed to terms or years, in class or independently done by students.

- Scalability - Use Skilly as a tool by defined group, class or year, we can build the right plan for you and scale-up.

- Enhanced engagement - Drive engagement through gamification, students can see their own performance and goals and compare against their peers.

- Community building - Use Skilly's data to assist conversation on wellbeing metrics engaging the community including parents.

Practice to perform

Accomplishment develops over time with repeat practice, so someone can grow and recognize their increasing achievements with Skilly.

The story of Skilly

The idea that *'practice makes perfect'* inspired founder Shane Maguire with the spark for Skilly, a cloud-based software training platform founded in 2019.

Skilly is designed to enable students to assess and improve their skill level through practice and recording of skills, whilst giving teachers a digital tool to reduce their work burden and a means of measuring engagement and progression with real-time data.

2020 and all its disruptive factors focussed Skilly's energy on building a solution with real social meaning to aid our teachers - a platform to empower our school children an students with the essential wellbeing and life skills.
